

PERSONALISING CARE IN ALLERGY, ASTHMA & COELIAC DISEASE

This webinar has been funded by Thermo Fisher Scientific

CPD Certificate

Personalising care in allergy, asthma and coeliac disease

This is to certify that

has watched and reflected on the webinar “Personalising care in allergy, asthma and coeliac disease”.

About “Personalising care in allergy, asthma and coeliac disease”

In this webinar:

- Professor Mukhopadhyay will talk about the importance of personalising care in children with asthma and allergy and discuss a new asthma history template.
 - Dr Pilat will talk about coeliac disease, coeliac disease comorbidities, the latest recommendations for testing, management and audit, and the new RCGP CPD module on coeliac disease.
-

My estimated time taken to watch the webinar and read and the references provided was*

1 CPD HOUR

The key learning points and their relevance for clinical practice taken from the webinar were:

It is possible to claim double the CPD credits for this item of learning than the hours taken to do it, if there is evidence that there has been an impact on practice.

Date of completion:

** It is the responsibility of the healthcare professional to correctly certify the length of time taken on the item of learning, and to provide evidence on whether or not it had an impact on their practice.*
